

## Rosler Wetblast System for Mold Cleaning

The answer to safe and efficient mold cleaning is with Rosler's Wetblast cleaning system. It provides the most effective method for cleaning molds without chemicals. The Rosler wetblast process is a proven self-contained system that uses a slurry of abrasive media and water to clean, deburr, descale and degrease surfaces in a single operation.

*Mold cleaned with Rosler Wetblast unit*

### Advantages:

- cleans pores and does not mask or seal in contaminants without any harm to the mold surface
- dust free operation
- No abrasive impregnation
- Wetblast cleaning of plastic molds yield increased running time before the mold must be re-cleaned

*Wetblast Model JKS 48/1*
